

***Bumbly Wumbly  
And  
Sunshine***

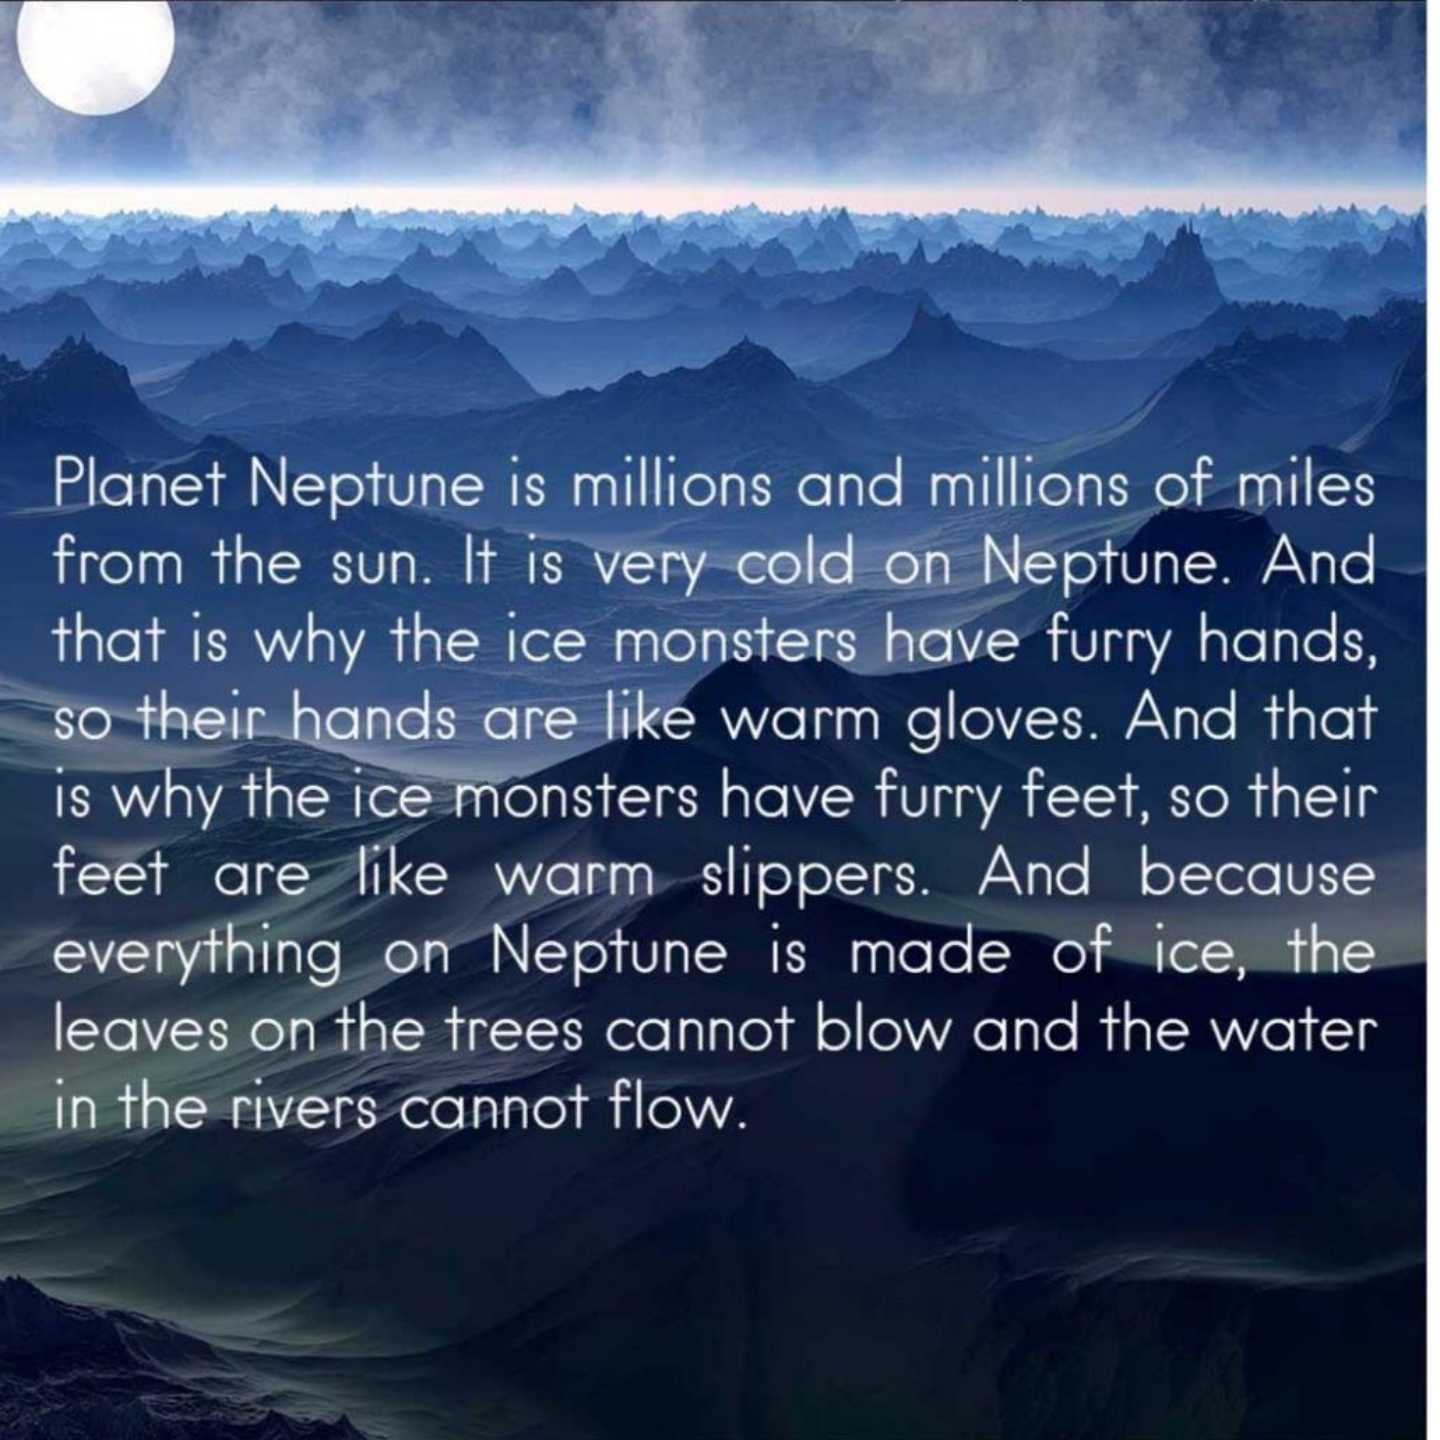

A vibrant space scene featuring a blue and green nebula, numerous stars, and several planets. The background is a deep purple and blue space filled with stars of various sizes and colors. In the upper left, a large blue and green planet is partially visible, with a smaller blue planet nearby. In the lower right, another large blue and green planet is visible, along with a smaller blue planet. The overall atmosphere is bright and colorful.

\* Bumbly Wumbly  
was an ice monster  
with furry hands and  
furry feet. He lived with  
all the other furry ice  
monsters on the  
planet Neptune.

A blue-toned landscape with mountains and a full moon. The scene is rendered in shades of blue and purple, with a full moon in the top left corner. The background features a range of jagged mountains under a cloudy sky. The foreground shows rolling hills and valleys, with a winding path or riverbed visible. The overall atmosphere is cold and serene.

Planet Neptune is millions and millions of miles from the sun. It is very cold on Neptune. And that is why the ice monsters have furry hands, so their hands are like warm gloves. And that is why the ice monsters have furry feet, so their feet are like warm slippers. And because everything on Neptune is made of ice, the leaves on the trees cannot blow and the water in the rivers cannot flow.

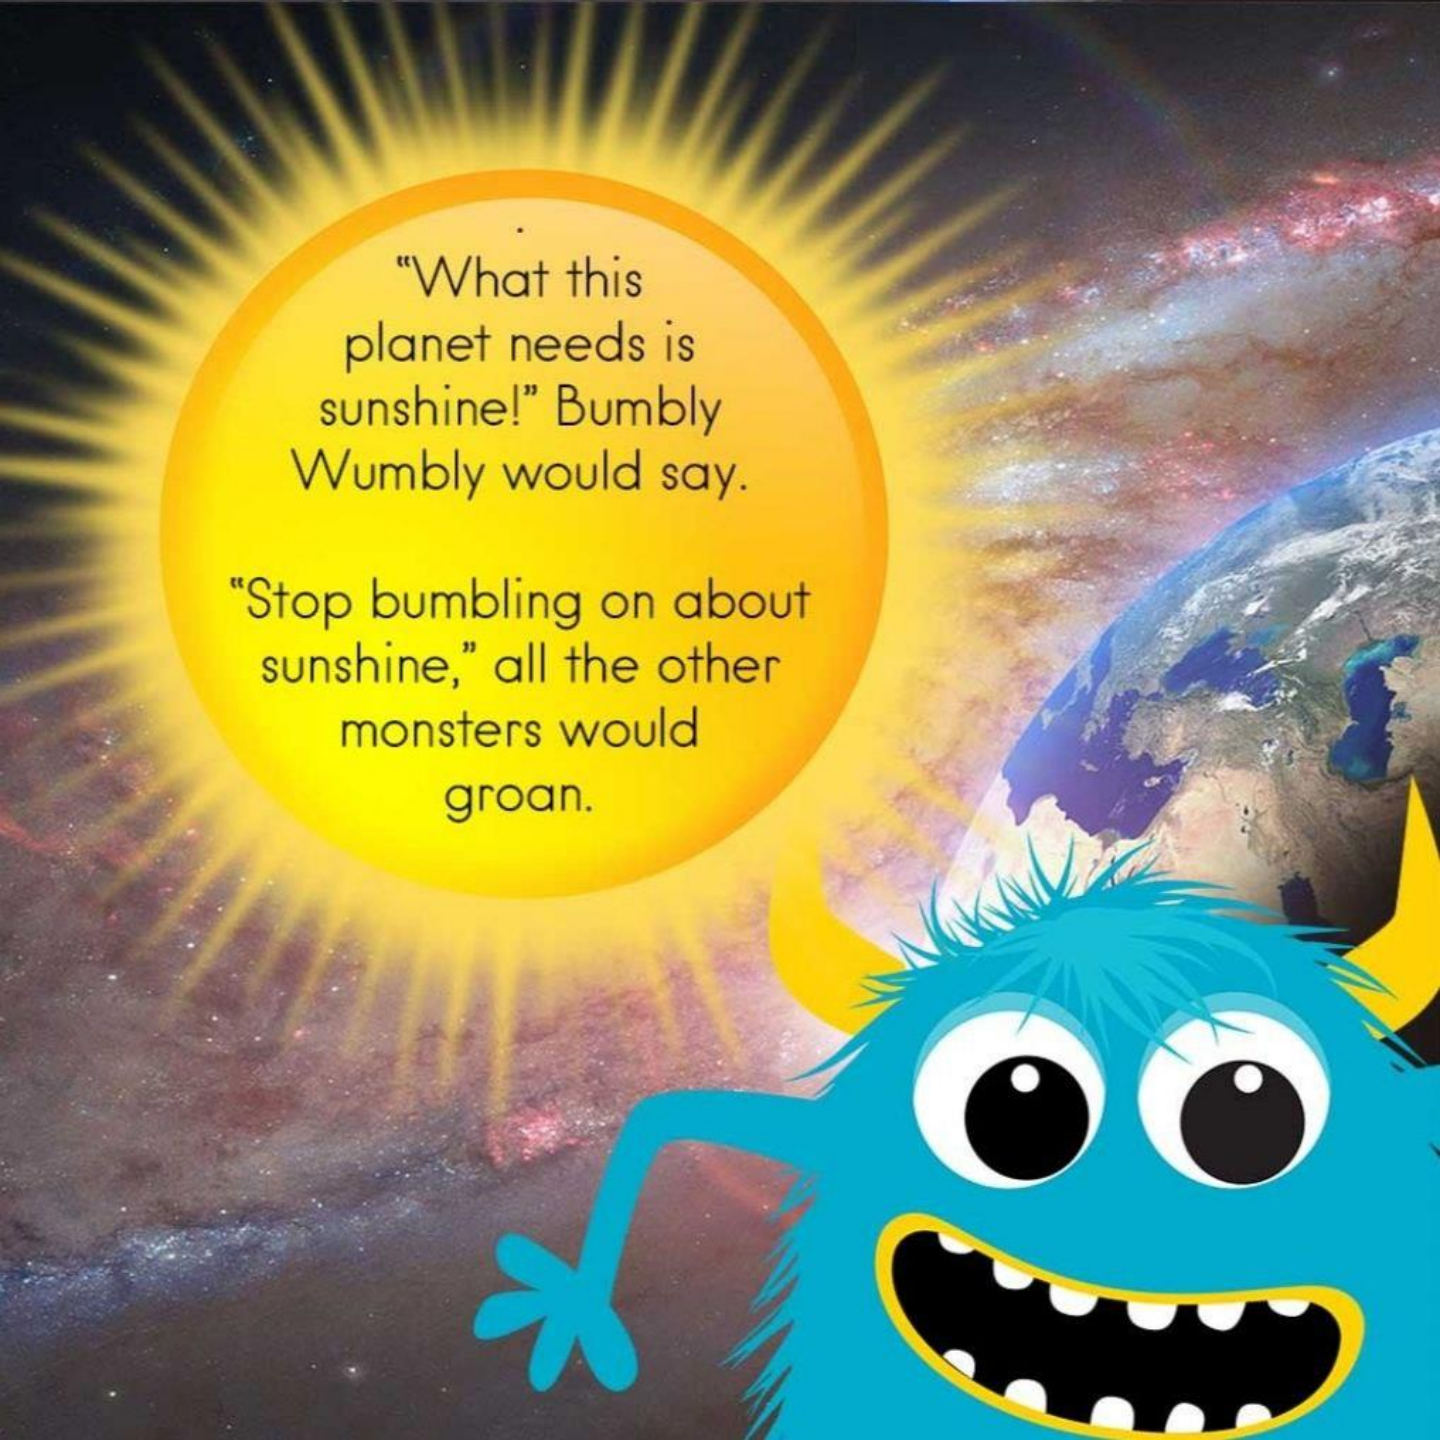

The monsters themselves have hearts of ice, so as you can imagine, they are cruel and mean and grumpy.

Only Bumbly Wumbly was different. Bumbly Wumbly was the youngest monster child of the Wumbly family. Everybody called him 'Bumbly' because he bumped on and on and on about sunshine.

“What this planet needs is sunshine!” Bumbly Wumbly would say.

“Stop bumbling on about sunshine,” all the other monsters would groan.

Bumbly Wumbly was sad. The other ice monsters would not play with each other and they would not smile or laugh, because they were cruel, mean and grumpy. Instead, they grumbled and fought. They bullied Bumbly Wumbly for dreaming too much about his sunshine.

Bumbly Wumbly tried to build a rocket so that he could fly to the sun. He chiselled and chipped away at the ice cliffs. He made an ice cone for the rocket's snout, an ice tube for the rocket's frame, and an ice seat for the rocket's inside. The problem was, he had no fuel to start the rocket. You cannot start a fire when you only have ice.

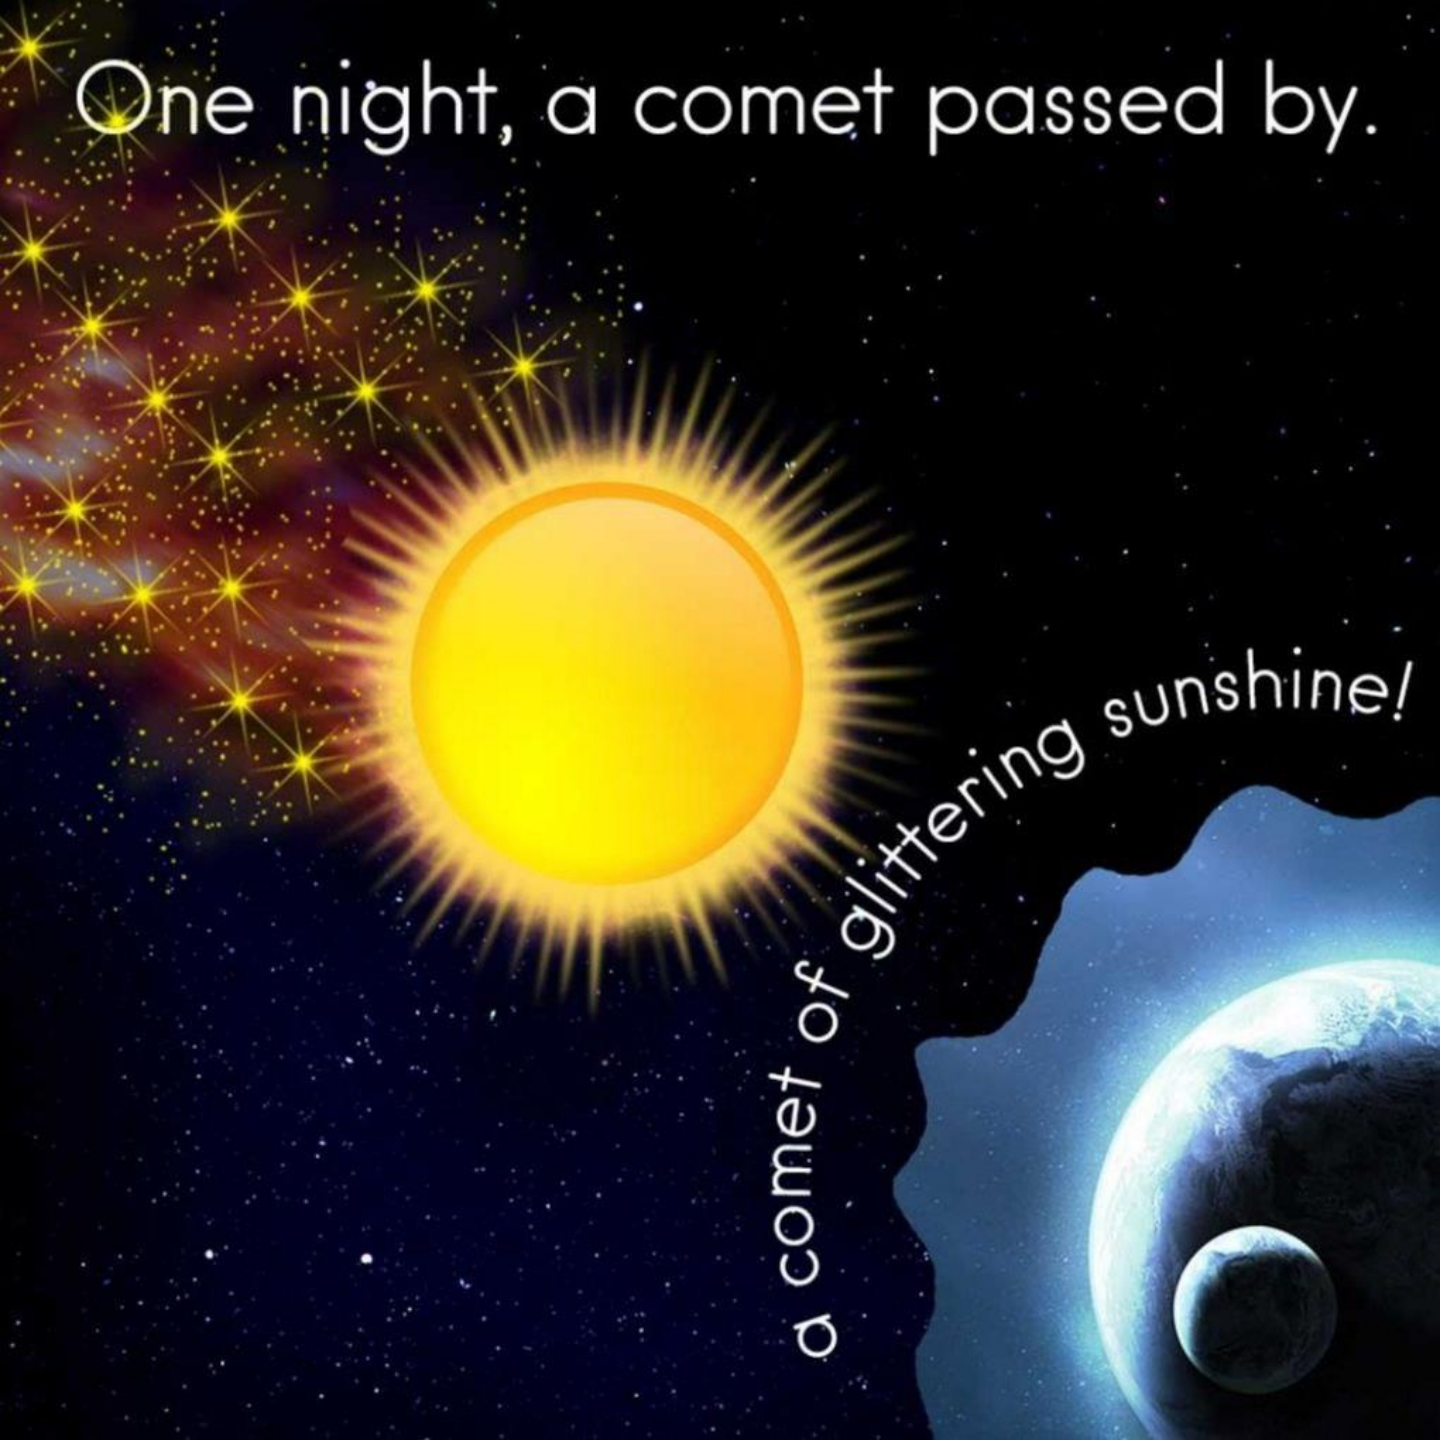

“Don’t be silly,  
Bumbly Wumbly!”

said the  
other furry,  
ice monsters  
in a cruel,  
mean and  
grumpy  
way.

“Forget about  
your sunshine!”

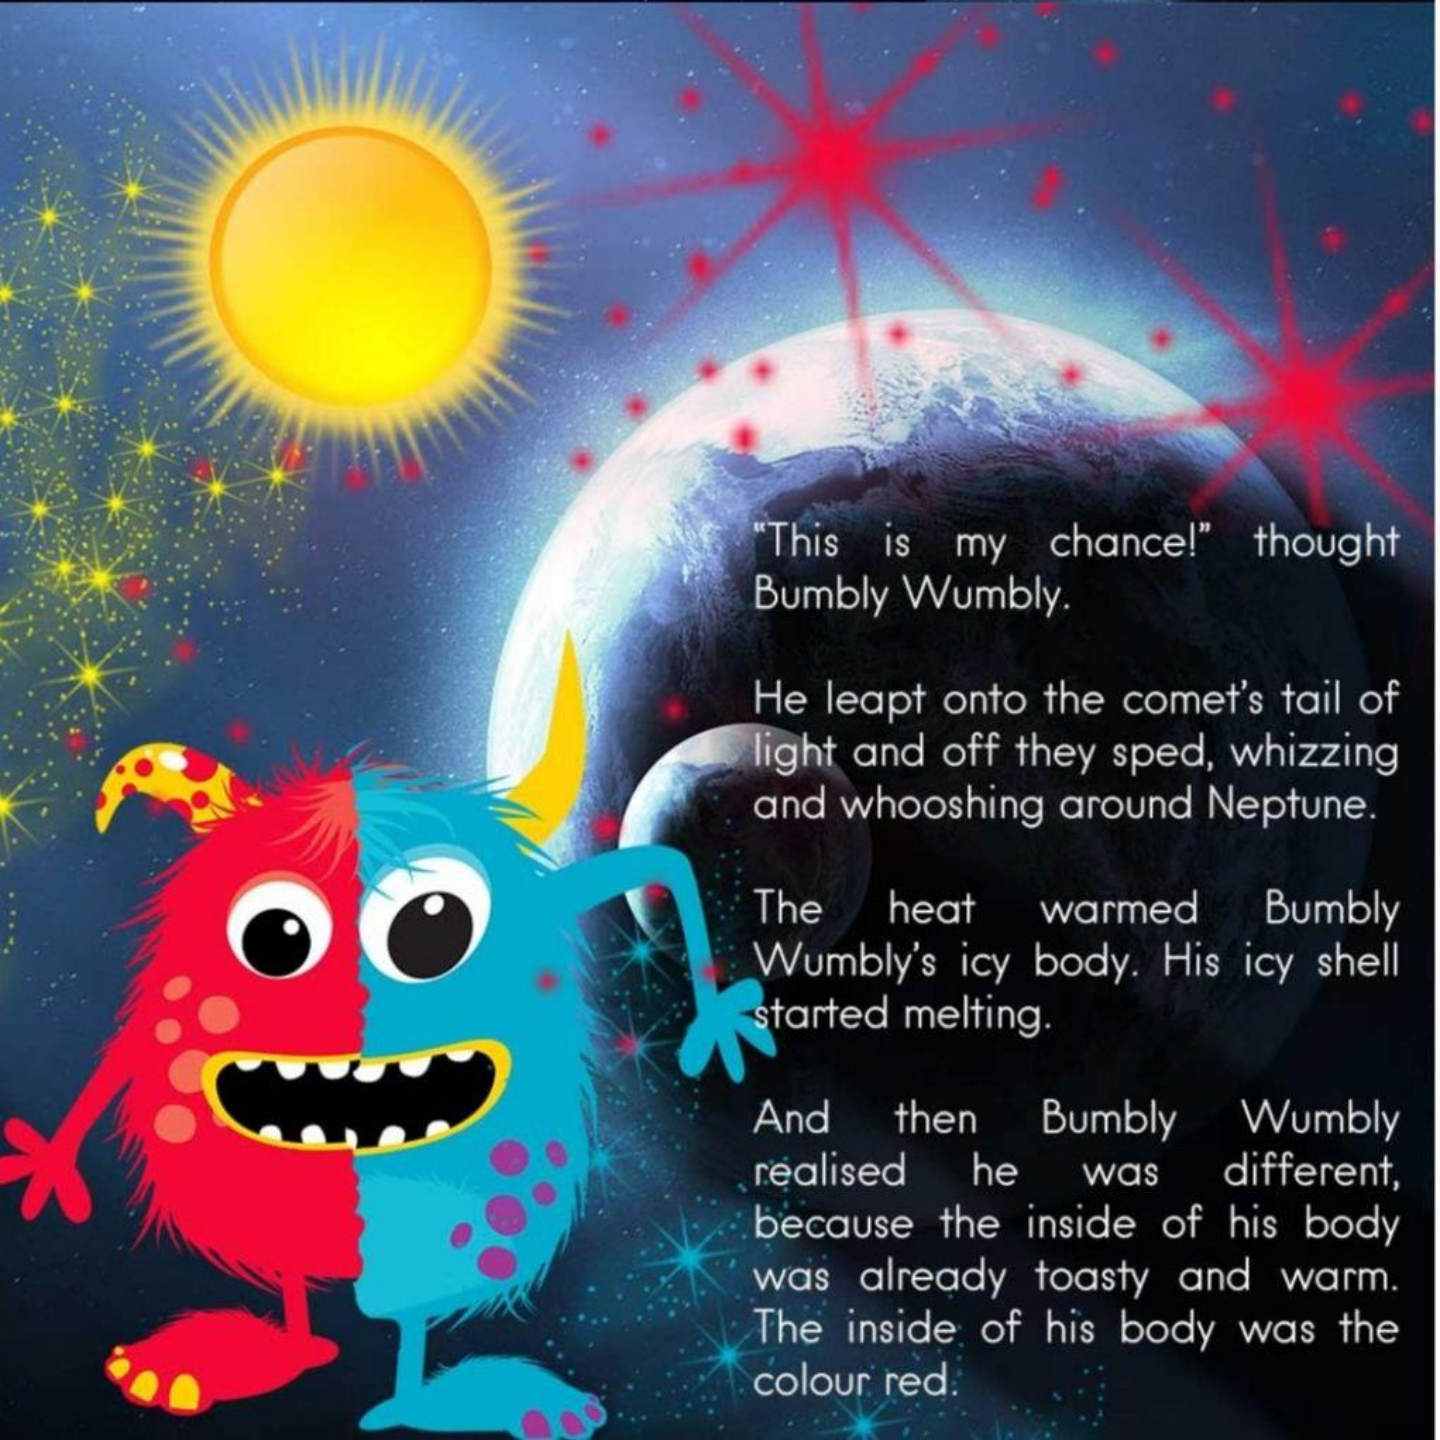

One night, a comet passed by.

a comet of glittering sunshine!

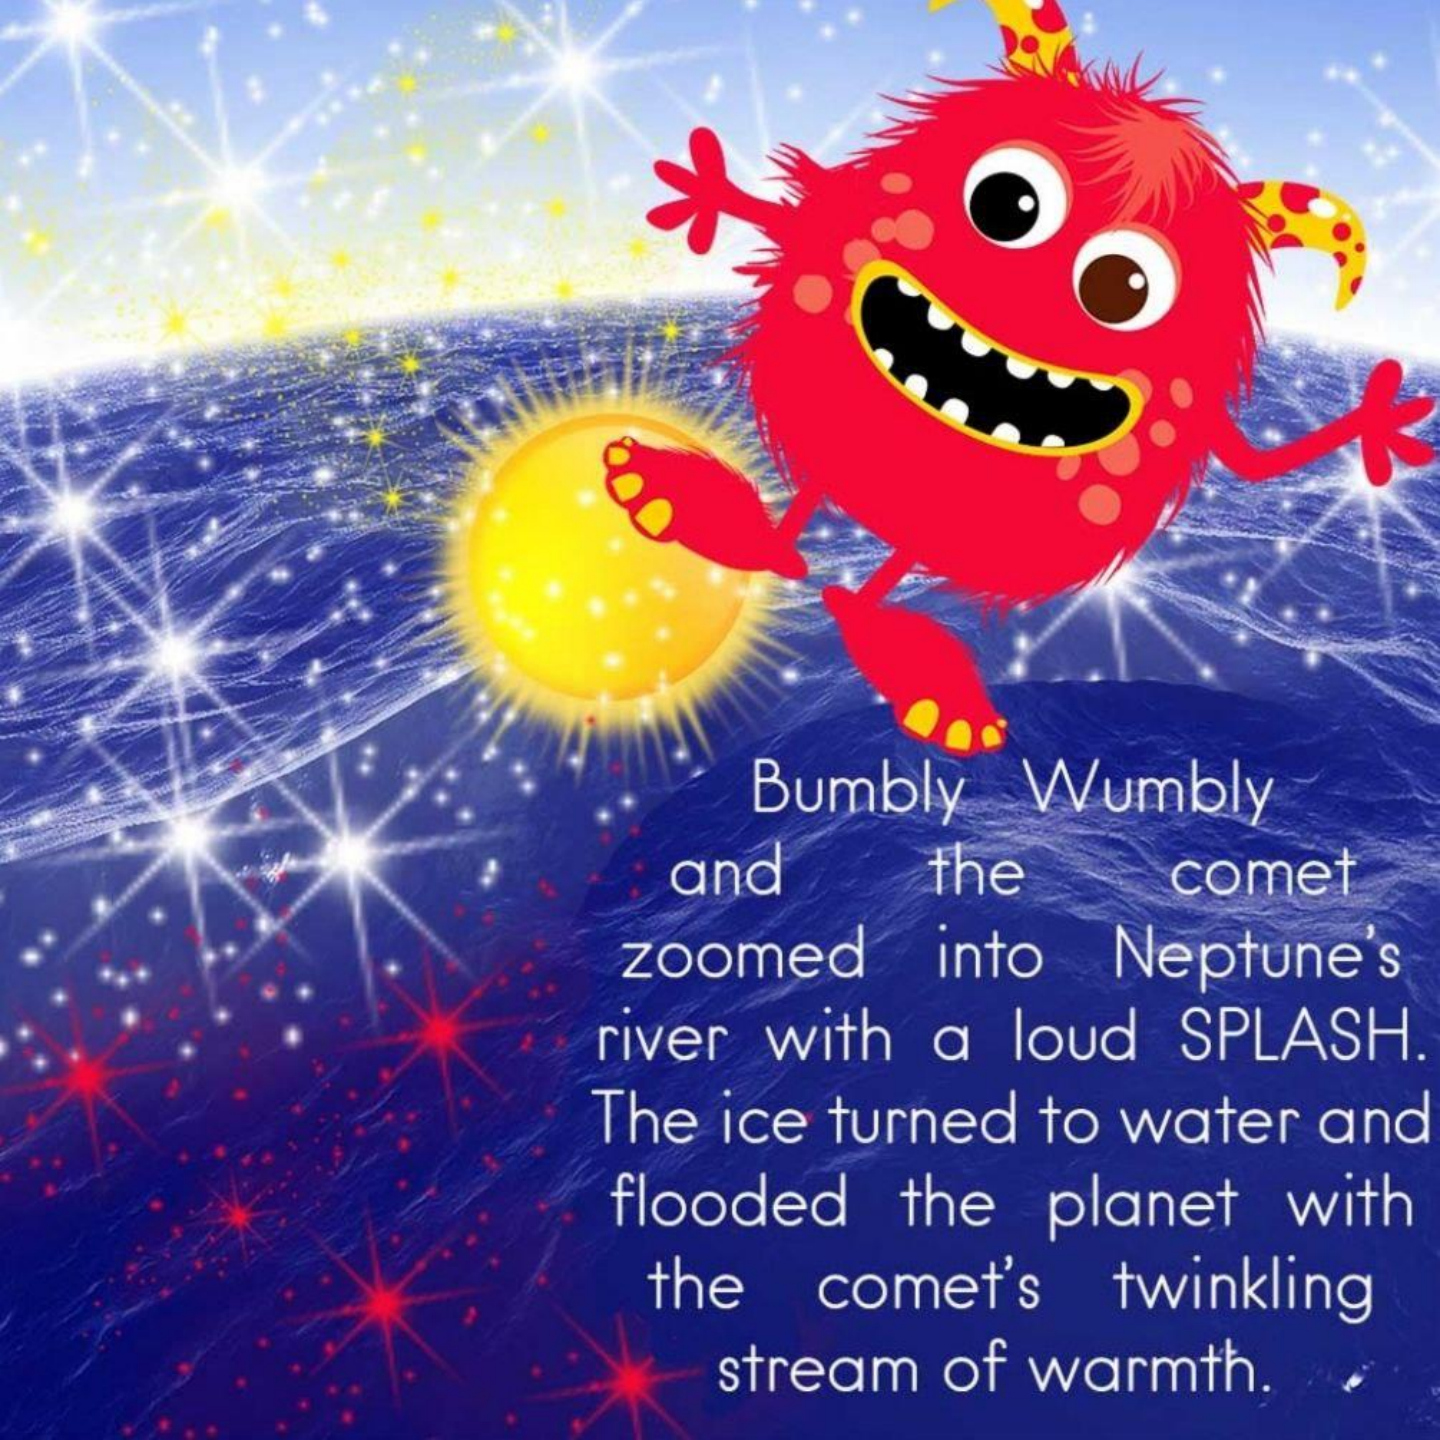

"This is my chance!" thought Bumbly Wumbly.

He leapt onto the comet's tail of light and off they sped, whizzing and whooshing around Neptune.

The heat warmed Bumbly Wumbly's icy body. His icy shell started melting.

And then Bumbly Wumbly realised he was different, because the inside of his body was already toasty and warm. The inside of his body was the colour red.

Bumbly Wumbly  
and the comet  
zoomed into Neptune's  
river with a loud SPLASH.  
The ice turned to water and  
flooded the planet with  
the comet's twinkling  
stream of warmth.

The background is a dynamic, multi-colored starburst pattern. It features a central bright yellow and white core that radiates outwards through a spectrum of colors: orange, red, green, and blue. The colors transition smoothly from the center to the edges. Numerous small, bright white stars are scattered throughout the background, adding to the cosmic feel. In the center of the image is a large, circular brown area with a textured, slightly grainy appearance. Inside this circle, the text is written in a white, sans-serif font. The text is arranged in several lines, with the word 'Neptune' on the first line, 'glittered and' on the second, 'glowed with light.' on the third, 'Everything that was' on the fourth, 'once a cold blue or' on the fifth, 'white turned a warm' on the sixth, and 'yellow or red.' on the seventh. The overall composition is balanced and visually striking due to the contrast between the colorful background and the central brown circle.

Neptune  
glittered and  
glowed with light.  
Everything that was  
once a cold blue or  
white turned a warm  
yellow or red.

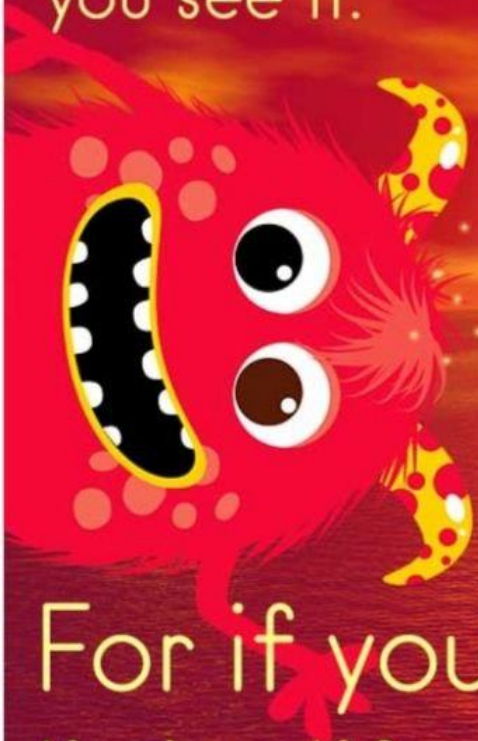

The monsters felt their hearts melt and suddenly they smiled and laughed and played. They were no longer furry, ice monsters. They were now the furry, warm monsters of Neptune!

"Thank you for leaping onto the comet and bringing us some sunshine!" said all the furry, warm monsters.

And so the monsters learnt, when things are cold and dark, it is important to be like Bumbly Wumbly. It is important to look out for the light and catch the sunshine when you see it.

For if you fill the world with light, life will be happy and bonny and bright.
